

NEEL PATEL

Software Engineer | Full Stack Developer | React.js | Next.js | Node.js | NestJS

Ahmedabad, Gujarat, India | +91 9724020636 | neelofficial19@gmail.com | linkedin.com/in/neel-patel-97079214a

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience building scalable, secure, and high-performance web applications across Finance, Healthcare, Education, and Food Technology domains. Experienced in React.js, Next.js, Node.js, NestJS, TypeScript, PostgreSQL, MongoDB, MySQL, Redis, Socket.IO, WebSockets, and Prisma ORM. Hands-on experience with REST API development, real-time systems, database optimization, caching, authentication, automated testing, and complex business workflows. Contributed to architecture discussions and delivered production applications with a focus on maintainability, performance, and reliability.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, Redux, Zustand, Tailwind CSS

Backend: Node.js, NestJS, Express.js, REST APIs, Authentication & Authorization

Database: PostgreSQL, MongoDB, MySQL, Prisma ORM, Database Design, Query Optimization

Real-Time & Caching: Redis, Socket.IO, WebSockets

Testing: Playwright, Jest

Integrations: Stripe, Razorpay, Agora SDK, Email, SMS, Push Notifications, TOTP

Architecture: Modular Application Design, RESTful API Design, RBAC, Event-Driven Communication, Cache-First Data Retrieval

Tools: Git, Jira, Postman, Swagger

Working Knowledge: AWS S3, GitHub Actions, Nginx

PROFESSIONAL EXPERIENCE

Acquaint Softtech Pvt. Ltd.

Software Engineer | Jan 2026 – Present

MERN Stack Developer | May 2025 – Dec 2025

- Developed full-stack applications using Next.js, NestJS, TypeScript, PostgreSQL, Redis, and Prisma ORM.
- Designed modular REST APIs supporting authentication, trading, negotiation, and other complex business workflows.
- Implemented Redis caching and optimized PostgreSQL queries to improve application responsiveness and reduce database load.
- Built real-time communication features using Socket.IO and WebSockets for live data synchronization and event updates.
- Contributed to architecture discussions covering API design, database modeling, application scalability, and technical implementation.
- Implemented TOTP-based MFA and developed browser/API automation tests using Playwright.
- Collaborated with frontend and backend developers to define API contracts and deliver maintainable production features.

Hyperlink Infosystem Pvt. Ltd.

MERN Stack Developer | Jan 2024 – May 2025

Node.js Developer | Jan 2022 – Dec 2023

- Developed RESTful APIs and backend services using Node.js and Express.js for multiple production applications.
- Built React.js websites, admin panels, and business management applications based on complex functional requirements.
- Designed and optimized MySQL and MongoDB schemas and queries for application-specific workloads.
- Integrated Stripe, Razorpay, Email, SMS, and Push Notification services across multiple projects.
- Improved application performance by approximately 30% through database query optimization and backend improvements.
- Built reusable modules, utilities, and components while mentoring 10+ trainees on implementation and debugging.
- Participated in production deployments and successfully delivered 6+ projects across Healthcare, Education, Food Technology, and Enterprise domains.

FEATURED PROJECTS

Real-Time Multi-Asset Trading Platform

Finance | *Next.js, NestJS, PostgreSQL, Redis, Prisma, Socket.IO, WebSockets, TypeScript*

- Developed a real-time trading platform supporting Bond, FX, and Swap buy, sell, negotiation, and execution workflows.
- Implemented Redis cache-first data retrieval and PostgreSQL query optimization for frequently accessed market data and low-latency workflows.
- Built WebSocket-based real-time price updates, negotiation events, order status updates, and trade execution notifications.
- Implemented TOTP-based MFA, modular APIs, trading workflows, and Playwright browser/API testing.

Interactive Learning Management Platform

Education | *React.js, Node.js, Express.js, MongoDB, Socket.IO*

- Developed course, lesson, assessment, and student-progress workflows for an interactive learning platform.
- Implemented timestamp-based video questions, adaptive learning flows, quizzes, and progress tracking.
- Built real-time one-to-one and group communication using Socket.IO.
- Developed reusable backend APIs and frontend modules for maintainable feature development.

Multi-Restaurant Ordering & Table Management Platform

Food Technology | *Node.js, Express.js, MySQL, Socket.IO*

- Developed QR-based collaborative ordering with real-time cart and order synchronization using Socket.IO.
- Implemented flexible bill splitting supporting equal, percentage, item-based, and custom payment distribution.
- Built restaurant, customer, and administrative workflows including future reservations and scheduled food ordering.
- Integrated payment and notification services for customer and restaurant workflows.

Healthcare Consultation & Appointment Management Platform

Healthcare | *Node.js, Express.js, MySQL, Agora SDK*

- Developed appointment and consultation workflows supporting Admin, Doctor, Nurse, Consultant, and Patient roles.
- Implemented availability-based scheduling and business rules to prevent conflicts and double bookings.
- Integrated Agora for one-to-one video and audio consultations.
- Developed backend services and administrative modules for healthcare operations.

KEY ACHIEVEMENTS

- Improved application performance by approximately 30% through database and backend optimization.
- Mentored 10+ trainees through technical guidance, debugging, and implementation support.
- Built real-time applications using Socket.IO and WebSockets and contributed to scalable backend design.
- Delivered 8+ production applications across Finance, Healthcare, Education, Food Technology, and Enterprise domains.

EDUCATION

Bachelor of Engineering – Computer Engineering | Swarnim Startup & Innovation University | 2021 | CGPA: 8.0/10

LANGUAGES

English | Hindi | Gujarati
